An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

In claim 22, claim 22 has been amended to read:

22. (Currently Amended) An apparatus, comprising: a first circuit having an input coupled to the output signal of the first circuit; [[and]] a second circuit detecting whether the output signal of the first circuit oscillates at a frequency that is less than a predetermined frequency by determining whether the output signal remains in one of a first or second logic state in excess of a predetermined period of time; a charging circuit that charges a capacitor in response to the output signal being in one of the first or second logic states; a discharging circuit that discharges the capacitor in response to transition of the output signal to the other of the first or second logic states; and a capacitor voltage detection circuit measuring a voltage stored on the capacitor, the measured voltage being indicative of whether the output signal remains in one of a first or second logic state in excess of a predetermined period of time.

Claim 32 has been cancelled.

In claim 33, line 1 "claim 32" has been changed to -- claim 22--.

In claim 34, line 1 "claim 22" has been changed to -- claim 33--. Also in line 1 of the same claim "the first voltage level" has been changed to --the first reference voltage level--. In line 2 of the same claim "the second voltage level" has been changed to -- the second reference voltage level--.

Authorization for this examiner's amendment was given in a telephone interview with Andre Szuwalski on January 21, 2005.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael B. Shingleton whose telephone number is (571) 272-1770.
